Hardwood Mulch

Available in 50L Bags

9 338456 002349

Item no: 2-TGF-HWM-50

Spend more family time in the garden and less time maintaining it.

Spread The Garden Family Hardwood Mulch across your garden beds, around trees and shrubs , along pathways or through native gardens and it gets to work straight away.

It helps lock in moisture to keep soil hydrated between waterings, insulates roots through hot summers and cold winters, and suppresses weeds before they get the chance to take hold.

With its fresh natural timber tone, it adds a finishing touch that gives your garden that just-landscaped look, without the landscaper price tag.

Features & benefits

- Helps suppress weeds.
- Trees, shrubs, flowers & natives.
- Protects roots & soil.
- Fresh, natural, timber tone.
- Helps retain moisture.

How to use

1. Remove all existing weeds from the area to be mulched and water the prepared soil.
2. If using Hardwood Mulch for the first time, spread an even layer to a depth of 50 mm.
3. When re-mulching existing areas, spread an even layer to a depth of 25 – 50 mm.
4. Ensure the mulch does not contact the trunks and stems of plants.
5. Once spread, water in the Hardwood Mulch to help improve water penetration.

How much will I get out of a bag?

Application	Depth	Coverage
Re-mulching	25 mm	2sq. Metres
Mulching	50 mm	1sq. Metre

Be aware that volume and depth measurements are rounded to the nearest full bag.
