Item no: 2-TGF-SSM-25

Around the garden, it helps lock in moisture, suppress weeds and protect soil as it slowly breaks down. Under play equipment, it provides a softer natural surface underfoot that helps cushion bumps and falls while blending beautifully into outdoor spaces. Ideal for garden beds and styling pots, this premium natural bark is slow to break down, helping protect soil and plants from weeds, erosion and temperature extremes season after season. A premium natural bark that works hard in the garden while helping families create safer, better-looking outdoor spaces.

Features & Benefits

- Premium pine bark 10 - 15mm.
- Ideal for pots and garden beds.
- Softer surface for play.
- Protects roots and soil.
- Helps suppress weeds.

How to use

1. Remove all existing weeds from the area to be mulched.
2. If you are using Softscape Playground & Designer Bark for the first time, spread an even layer to a depth of 50 mm.
3. When topping up existing mulched areas, spread a fresh layer to return the bark to a depth of 50 mm.
4. Keep the bark a few centimetres away from the stems and trunks of plants.
5. Once spread, water in Softscape Playground & Designer Bark to help it settle and begin retaining moisture in the soil.

How much will I get out of a bag?

Application	Depth	Coverage
Re-mulching	25 mm	2sq. metres
Mulching	50 mm	1sq. metres
Playground installation	300 mm and should never be below 200 mm	
Potted plants	Apply to a depth of 20 - 30 mm leaving a 10 mm space around plant stems	

Be aware that volume and depth measurements are rounded to the nearest full bag.

Using Softscape in playground areas

For the best results in playground areas, install Softscape Playground & Designer Bark to a depth of 300mm and maintain adequate coverage throughout the play space.

Regular checks

Every few months, check the bark depth across the play area, particularly under swings, climbing equipment and at the base of slides where bark may become displaced through regular use.

Rake bark back into place where required and top up areas that have become worn or compacted.

Annual maintenance

Conduct a full inspection of the play area each year to ensure adequate bark depth is maintained throughout the space.

Ongoing care

Regular top ups will help maintain the appearance and performance of Softscape Playground & Designer Bark in both playgrounds and garden beds.

Potted plant application

Softscape Playground & Designer Bark can also be used as a decorative mulch layer in pots and planters. Apply to a depth of 20–30mm, leaving approximately 10mm clearance around plant stems.

Garden use

Ideal for garden beds, trees, shrubs and feature plantings, Softscape Playground & Designer Bark helps retain soil moisture, suppress weeds and create a neat, finished landscape appearance.
